

Where do pumpkins grow?

Each pumpkin on the map stands for 500,000 tonnes of pumpkins, squash and gourds grown in 2024.

If every pumpkin weighed 5 kg, that would be 100 million real pumpkins in each one!

India grows the most!

9.3 million tonnes:
about 1 in 4 of all the world's
pumpkins grows there.

China comes second

7.7 million tonnes:
about 1 in 5 pumpkins
in the world.

Can you find your country?

Does it grow pumpkins?
Which ocean is
next to it?
